EXPERIENCE

REPLICON

October 2021 - October 2022

Software Engineer I

- Completed hours of training in Web Development with React.
- Wrote well-designed and efficient code for complete UI of Role-based access control.
- Collaborated with seniors to update the webpage and create new features by using the best practices in JavaScript, and HTML/CSS.
- Took care of exposed passwords and tokens in logging during mobile push notifications
- Built automation test cases to ensure a seamless flow of new features.

PROJECTS

<https://www.github.com/Ashutosh1499>

Restaurant delivery application

<https://www.khanaghardelivery.netlify.app>

- Built a full-stack web app for online restaurant food delivery using M.E.R.N.
- Developed different APIs for fetching food data and user order history.
- Improved user experience by reducing page load times by 25% and increasing customer base by 30%.
- User passwords are securely stored using bcrypt salt and hash.
- Account login session secured with JWT token.

User Dashboard UI (React)

<https://www.panorbit-task.netlify.app/>

- The site showcases user data on a clean dashboard with a minimal design and modern UI.
- Built using React, Node, and MUI.
- Fetching data from API and populating every user data on different pages based on the user selected with the help of reusable components.

Personal Expense Tracker

- A React-based project which keeps track of all the transactions made including salary credit, and bonus credit, and shows the monthly expense on different things.
- The tracker also provides a graphical representation of a person's expenses and savings, allowing for a comparison with every month.

EDUCATION

Cambridge Institute Of Technology

2017 - 2021

- Bachelor of Engineering - Computer Science
- CGPA : 7.4
